

Jeff Davis at Hwy 85 Intersection Improvements

March 22, 2006 Update

This project includes construction of a short left turn lane from northbound Jeff Davis to southbound Hwy 85. This left turn lane will be separate from the northbound through lane that goes from Jeff Davis to Hwy 314. This will allow the through traffic to proceed on a green light without backing up behind vehicles turning left from Jeff Davis onto Hwy 85. The left turn lane will be very short due to odd configuration of the intersection but will help prevent backups.

The right turn lane from northbound Jeff Davis to northbound Hwy 85 will be modified slightly for safety reasons.

GDOT has agreed to fund and administer this project. It is scheduled for construction in 2006.
